

ATLEY SOLUTIONS HAS BEEN SELECTED AS ONE OF SWEDEN'S BEST STARTUPS BY NYTEKNIK

Gothenburg, Sweden – 14 November 2024 – Atley Solutions has for the third time been selected as one of Sweden's 33 best startup companies in the prestigious "33-listan" presented by the magazine NyTeknik. Companies are selected based on the impact of their technology, their potential for global scale up, and the commercial potential of their business model.

The 33 companies on Ny Teknik's annual list all have one crucial thing in common: They have developed their own unique technology, which tackles important and global problems.

"Gold Companies" are those companies that feature on the list three times, which is also the maximum. After also appearing in 2021 and 2023, Atley is one of seven companies to reach this milestone in 2024. The motivation for including Atley for the third time was that the company has successfully delivered the first three commercial Atley C100 modules to customers, generating revenue for the company whilst bringing the unique technology to laboratories in Europe and the US.

"It is fantastic to be included in NyTeknik's list for a third time" says Atley CEO Milton Lönnroth, "To reappear on the list, we have had to show significant growth and market traction year-on-year, so it is a clear indicator that the whole team continues to deliver great results."

The complete list of companies including more information about the nomination process can be accessed here (article in Swedish): [Här är 33-listan 2024 – Sveriges hetaste startups](#)

About Atley Solutions

Atley Solutions is the global leader in commercial products and services for the development, clinical evaluation and commercialisation of At-211 radiopharmaceuticals. The Atley C100 is the world's only commercial module for automated manufacturing of At-211 radiopharmaceuticals. Atley also offers non-clinical radiopharmaceutical development services and is a key supplier of At-211.
